LET'S MAKE
CREATING FOOD EASY

Our mobile app allows you to scan items in your pantry and suggest recipes based on the ingredients scanned. Based on the suggestions, you can also vote with your family and friends what you all want for dinner!

"I'm on a seafood diet. I see food and I eat it. – Dolly Parton

DEMOCRACY

Want to control your own destiny? Well, maybe just control what you want for your next meal. Our mobile app allows people to vote for their next meal based on the suggested recipes. Let the voting begin!

AFFORDABILITY

Struggling with your food budget? Fear not, our mobile app will suggest recipes based on just the food left on your pantry. No more food gone to waste, and we can stretch our wallets a bit more.

DIVERSITY

Gone are the days of having the same food everyday. Our mobile app can suggest hundreds or even thousands of recipes based on your pantry. If you want Asian cuisine, our app allows you to filter your search!
